

TREE SPECIES (SCIENTIFIC NAME)

Paraserianthes lophantha

ENGLISH COMMON NAME

Crested wattle

INDONESIAN COMMON NAME

Kemlandingan gunung, Kayu waek (Flores), Mlandingan Gunung (Javanese), Ki haruman (Sundanese)

TREE FAMILY

FABACEAE

AVERAGE LEAF SIZE (CM)

0.8cm × **0.25cm**
Length Width

DISTRIBUTION

NATIVE TO INDONESIA

ELEVATIONAL RANGE (M)

0–300m

TREE HEIGHT

SHRUB (1–10M)

NATIVE TO

Region: Oceania

Indonesia: Java, Lesser Sunda Islands, Sumatra

COFFEE AGROFORESTRY INFORMATION

COFFEE SYSTEM

ARABICA

COFFEE IMPACT

BENEFICIAL TO COFFEE

TREE MANAGEMENT

Seeds germinate easily after fire or acid treatment

REGENERATION

REGENERATES NATURALLY

CULTIVATION

PLANTED

PREVALENCE

Unknown

TREE BENEFITS AND USES

FARMER USES

Food

In Java the seed may be used as a vegetable as a substitute for petai (*Parkia speciosa*) or as seasoning to replace jengkol (*Archidendron jiringa*).

FARM SERVICES

Coffee Shade, Soil Improvement, Nitrogen Fixation

BIODIVERSITY BENEFITS

Unknown
